

ODYSSEY

For the iPad

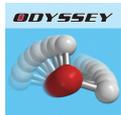

States of Matter

Comparing Solids, Liquids, and Gases

Intermolecular Forces

Why Do Molecules Form Liquids and Solids?

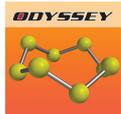

Water at the Molecular Level

Examining the Medium of Life

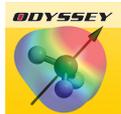

Ionic Bonding

How Do Ions Form Compounds?

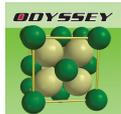

Chemical Elements

Molecular Structure and Dynamics Across the Periodic Table

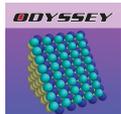

Polar Bonds and Molecules

What is the Distribution of Charge?

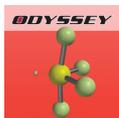

Ionic Solids

Fundamental Structure Types

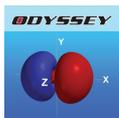

Crystal Surfaces

Elemental Low-Index Surfaces at Atomic Resolution

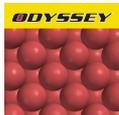

VSEPR Theory

Predicting Molecular Shapes

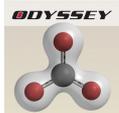

Atomic Orbitals

Where Are the Electrons in Atoms?

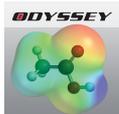

Common Substances

Introduction to the Molecular Level

Multiple Bonds and Resonance

How Close to One Another Are the Atoms in Molecules?

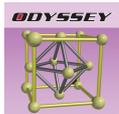

Functional Groups

Classifying Organic Molecules

Electron Sharing

What Do Covalent Bonds Look Like?

Basic Crystal Lattices

Elemental Metallic and Network Solids

Minimum Requirements

iPad 2 or higher, iOS 7 or higher

Included with Each App

- A set of fully **3D** models that can be inspected at any orientation and zoom level
- Transparent, mesh, and solid styles for **electron density** (where applicable)
- Molecular dynamics **simulation** capability (selected models)
- Multiple-choice **questions** for self-assessment, **comments**, and **glossary**

Pricing

Volume Purchase Program (20 iPads or more)

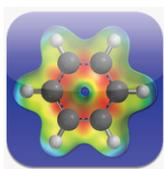

\$1.99 (per app)

Individual App

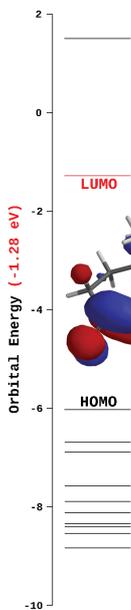

\$3.99 (per app)

SALES@WAVEFUN.COM | WWW.WAVEFUN.COM

iSpartan

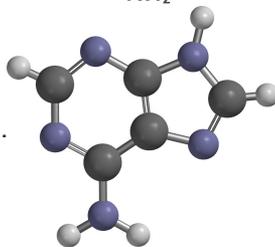

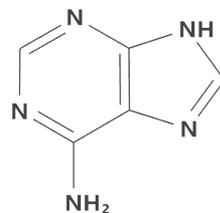

- A versatile app for molecular modeling on the iPad, iPhone, and iPod Touch.

- For researchers, educators, and students.

- 2D sketching with auto conversion to 3D molecular structure.

- Calculated spectra and properties for > 5,000 molecules in local database.

- Optional remote submission to **Spartan Parallel Suite** (available from store.wavefun.com).

Available for Any Structure

- Equilibrium conformer
- Energy diagram
- R/S chirality
- Log P
- Conformer distribution
- Molecular weight and volume
- Total surface area and polar surface area
- Distances, angles, and dihedral angles

Available for > 5,000 Molecules in Local Database

- NMR Spectrum
- Thermochemistry
- Infrared Spectrum
- Orbitals and Electrostatic Potential Maps

Minimum Requirements

iPad, iPhone, and iPod Touch; iOS 7 or higher

Pricing

Volume Purchase Program (order of 20 or more)

\$9.99 per app

Individual App Purchase

\$19.99 per app
